

Resources for respiratory programs

Books available now. An app in development.

Medical Education Dynamics develops learning apps to help healthcare professionals prepare for licensure exams. Respiratory Edge focuses on TMC preparation; its published companion books and merchandise are available separately.

English and Spanish companion books

Understanding Respiratory Care: Complete Student Study Guide and Comprender los cuidados respiratorios introduce Patient Evaluation and twelve respiratory-care chapters. The interiors use learning goals, explanations, worked examples, figures, key study points and references. Free opening-page samples are available for educator review.

Respiratory Edge app preview

An AI-driven TMC preparation app in development, with Crystal for study questions, a 3D lung model, the 12-chapter study guide and tools to create a personal guide. Screenshots and progress updates illustrate development; no release date or exam-pass guarantee is offered.

Department and cohort merchandise

Explore the existing Respiratory Edge collection for students, respiratory teams and educator gifts. For a group inquiry, include the product, sizes, quantity, destination and required date. Availability, production, shipping and price must be checked before any group quote; no volume discount is currently promised.
